ORDER
Astana city

**On approval of the surveillance schedule
for ensuring flight safety and aviation security for 2026**

In accordance with Articles 10-2, 16-4, and 16-5 of the Law of the Republic of Kazakhstan “On the Use of the Airspace of the Republic of Kazakhstan and Aviation Activities,” the Resolution of the Government of the Republic of Kazakhstan dated April 22, 2011 “On the Rules for Conducting Quality Control over Compliance with Aviation Security Requirements,” the Standards and Recommended Practices (SARPs) of the International Civil Aviation Organization (ICAO), and for the purpose of implementing the State Safety Program, **I ORDER:**

1. Approve the attached Schedule.
 - 1.1 Schedule of ramp and route inspections of civil operators;
 - 1.2 Schedule of inspection of general aviation (GA) operators;
 - 1.3 Schedule of inspections of Examination activities;
 - 1.4 Schedule of ground handling activity control;
 - 1.5 Schedule of random inspections of non-certified aerodromes of the Republic of Kazakhstan;
 - 1.6 Schedule of inspections of civil aviation entities and shippers involved in the transportation of dangerous goods by air;
 - 1.7 Schedule inspections of UAS aerial works operators;
 - 1.8 Schedule for Monitoring Compliance with the Requirements of the Rules for Determining the Qualification Level of Aviation Personnel During ATPL Subject Examinations and Modular Training Examinations for Aircraft Maintenance Specialists, for the Purpose of Issuing Aviation Personnel Licenses;
 - 1.9 Schedule for Conducting Aviation Security Inspections of Airport (Aerodrome) Operators, Air Navigation Service Providers, as well as Operators of Aircraft of the Republic of Kazakhstan and Foreign Air Carriers;
 - 1.10 Schedule for Conducting Cybersecurity Inspections of Airport (Aerodrome) Operators, Air Navigation Service Providers, and Aircraft Operators of the Republic of Kazakhstan.
2. Carrying out ramp inspections in accordance with the approved schedule.
3. I reserve control over the execution of this order.
4. This order comes into force from the date of signing, is subject to familiarization and distribution.

Acting Chief Executive Officer

A. Satzhanov

**JOINT STOCK COMPANY
AVIATION ADMINISTRATION OF KAZAKHSTAN**

SURVEILLANCE SCHEDULE FOR ENSURING FLIGHT SAFETY AND AVIATION SECURITY FOR 2026

2. General provisions

The Schedule of Oversight for Ensuring Flight Safety and Aviation Security for 2026 (hereinafter – the Schedule) has been developed by the Aviation Administration of Kazakhstan JSC (hereinafter – AAK) in accordance with Article 16-4 of the Law of the Republic of Kazakhstan dated July 15, 2010 “On the Use of the Airspace of the Republic of Kazakhstan and Aviation Activities” (hereinafter – the Law) and the Resolution of the Government of the Republic of Kazakhstan dated April 22, 2011 “Rules for Conducting Quality Control over Compliance with Aviation Security Requirements.”

The Schedule defines the frequency of inspections, tests, and reviews related to ensuring flight safety and aviation security by civil aircraft operators and civil aviation organizations, as well as their compliance with the legislation of the Republic of Kazakhstan on the use of airspace and aviation activities. It also determines the procedure for conducting quality control of aviation security measures to ensure adequate protection of civil aviation from acts of unlawful interference, as well as compliance with and evaluation of the effectiveness of aviation security standards, rules, and procedures.

AAK conducts oversight of flight safety and aviation security among individuals and/or legal entities whose activities are not subject to certification by the authorized body in civil aviation but fall within the scope of activities specified in Article 10-2 of this Law.

Oversight is carried out through spot-checks and unscheduled inspections of individuals and/or legal entities, observation and analysis of their activities in terms of compliance with flight safety requirements, and testing of aviation security systems.

Quality control in the field of aviation security is carried out through:

1) Spot-checks (no more than once per year) and unscheduled inspections of aerodrome (heliport) operators, operators of civil aircraft of the Republic of Kazakhstan, and foreign aircraft operators performing regular flights to airports of the Republic of Kazakhstan:

- inspection of safety conditions;
- spot-check inspection.

2) Analysis of the state of aviation security, development of recommendations, identification of deficiencies, and implementation of corrective actions with subsequent follow-up control;

3) Security system tests, conducted by AAK aviation inspectors in coordination with national security agencies and with the participation of law enforcement representatives.

The number of personnel involved in quality control activities is determined based on the scope of the inspection.

Spot-check inspections are conducted using approved guidance materials and within the timelines established by the Schedule.

The Schedule is prepared and approved by the Chief Executive Officer of AAK or a duly authorized representative no later than December 15 of the preceding year.

3. Objectives of the surveillance schedule for Ensuring Flight Safety and Aviation Security

The objectives of the Surveillance schedule are as follows:

1. To cover all areas of activity of civil aircraft operators and/or civil aviation organizations related to flight safety and aviation security that are not subject to certification by the authorized civil aviation organization but fall within the scope of activities specified in Article 10-2 of this Law;
2. To ensure the rational allocation of available resources;
3. To monitor the implementation of inspector directives aimed at eliminating identified violations of the legislation of the Republic of Kazakhstan on the use of airspace and aviation activities, based on the results of inspections and other forms of oversight;
4. To focus attention on areas where issues were identified during previous inspections;
5. To monitor the implementation of corrective actions aimed at eliminating violations detected during previous inspections and other forms of oversight and supervision.

4. Planning of Inspections Based on Risk Assessment

Inspection planning is carried out by the structural unit of the Civil Aviation Administration of Kazakhstan (AAK), taking into account the risk levels of civil aircraft operators and/or civil aviation organizations, including:

- the frequency of inspections (selection of the operator and/or civil aviation organization for a particular year of oversight);
- the scope of inspection (selection of areas to be checked and the relevant checklist questions);
- the results of previous inspections.

The planning process follows the Surveillance schedule and the instructional materials of the relevant structural units of the AAK, based on the principles of equality, impartiality, and necessity.

Spot checks are carried out with prior notification of civil aviation organizations. Inspection plans are approved in the form of an annex to this Oversight Schedule, except for spot checks conducted without prior notification of operators and civil aviation organizations.

Inspection plans that include prior notification are published on the official website of the AAK to allow operators and organizations to prepare for upcoming inspections and ensure continuity of operations. In such cases, operators and organizations are notified in advance of the inspection dates.

Risks and hazards are managed by operators and civil aviation organizations within the framework of their internal management systems (Quality Management System – QMS and Safety Management System – SMS).

5. Procedure for Amending the surveillance Schedule for Flight Safety and Aviation Security

Amendments to the surveillance Schedule for Flight Safety and Aviation Security are made by the Department of Management Systems and Rulemaking upon the initiative of the responsible structural units of the AAK, based on a substantiated justification addressed to the Chief Executive Officer of the AAK or an authorized acting person, no later than the 10th day of the following month.

Information on the introduced amendments is recorded in the Register of Changes and Additions.

6. Monitoring the Implementation of the surveillance Schedule for Flight Safety and Aviation Security

The Department of Management Systems and Rulemaking of the AAK, together with the relevant structural divisions, carries out monitoring of the timely and proper implementation of the surveillance Schedule for Flight Safety and Aviation Security, the results of which are taken into account when analyzing flight safety and the quality of aviation services provided by operators and civil aviation organizations.
